Zia Ul Ameen SH

Front-End Web Developer

E-mail : testitziaul@gmail.com

Mobile : +91 8300321478

SUMMARY

Frontend Developer with 1.3 years of experience in building responsive and user-friendly web applications. Skilled in JavaScript frameworks such as ReactJS and NextJS, as well as front-end development with Laravel, and developing expertise in back-end technologies like Node.js, MongoDB, and SQL. A quick learner, adaptable to new concepts and libraries, dedicated to creating efficient, scalable solutions that align with user and business needs.

PROFESSIONAL EXPERIENCE

Zethic Technologies — Nov 2023 - Present

Web Developer

- My role at Zethic involved working on various React and Next.js projects to develop modern, responsive, and user-friendly web applications. As a Frontend Developer, I focused on creating clean, well-structured, and maintainable code while ensuring seamless user experiences. I also contributed to front-end development using Laravel, showcasing versatility in handling different frameworks and technologies. My work emphasized delivering scalable and efficient solutions tailored to meet business and user needs.

Paywize

- Worked on payment solution projects focused on creating secure, user-friendly platforms by developing and maintaining application interfaces, collaborating with team members for seamless functionality and design, and optimizing the platform for reliability.

Godrej Properties

- Contributed to projects for Godrej Properties by designing and implementing user-friendly features for property browsing, creating engaging interfaces for seamless customer interaction, and collaborating with the team to uphold high-quality development standards.

- These experiences have helped me gain expertise in developing robust solutions, improving user interfaces, and working collaboratively in dynamic team environments.
